Dr. Timothy Kosinski’s case was presented as a poster presentation at the American Academy of Implant Dentistry’s annual meeting in Las Vegas from Nov. 7-11.

**Abstract:** Conventional design of dental implant prostheses has historically used prepared titanium abutments and porcelain fused to metal crowns. Internal design of dental implants has allowed for predictable tooth by tooth reconstruction.

In late October, the American Academy of Periodontology (AAP) hosted its 93rd Annual Meeting in Washington, DC, which drew in about 8,000 attendees and 180 exhibiting companies.

The meeting began with an opening ceremony, launching the four-day event. Preston D. Miller, Jr., DDS, 2006-2007 AAP President, gave his Presidential Address to the crowd of AAP members, colleagues and other guests. At the opening ceremony, the Academy presented awards such as the Gold Medal Award to Michael G. Newman, DDS,
