Sterngold now offers the ORA, the ball and o-ring attachment system

By Sterngold Dental Staff

Sterngold Dental is pleased to announce it now offers the ORA, the ball and o-ring attachment system. The ORA System is indicated for use with dental implants to support and/or retain removable dental prostheses in the treatment of partially or totally edentulous patients to restore chewing function. The abutment screws directly into endosseous implants or it screws into SFI Abutments, which are screwed into endosseous implants.

To order, call (800) 243-9942.

About Sterngold Dental

Founded in 1897, Sterngold Dental is a world leader in dental products and specializes in alloys, attachments, implants and restorative systems. Examples are the Stern ERA family of resilient dental attachments and the Natural Profile Abutment System for esthetic restoration of osseointegrated implants. Sterngold Dental is EN ISO 13485:2012+AC:2009 and ISO 13485:2003 (CMDCAS) certified, and it also complies with the European Medical Device Directive (93/42/EEC), FDA Quality System Regulations and MHLW Ministerial Ordinance No. 169. All products and procedures are closely monitored under these quality systems. Sterngold Dental’s implant products have full approval to market in the United States, Sweden and more than 20 other countries. For more information, visit www.sterngold.com.

Carestream partners with Zimmer Dental

Partnership offers clinicians hands-on experience with the CS 9300 Imaging System

Carestream Dental recently announced a partnership with Zimmer Dental Inc., a leading provider of dental oral rehabilitation products, and the Zimmer Institute, a world leader in the educational field of oral rehabilitation.

The partnership involves the placement of Carestream Dental’s CS 9300, an all-in-one extroral imaging system that supports a wide range of clinical applications for different oral health specialties, at the Zimmer Institute located in Parsippany, N.J.

As a leader in implantology educational programs, the Zimmer Institute provides an interactive learning environment to enhance training. With four locations, the Zimmer Institute has served the needs of more than 6,000 clinicians globally during the last nine years.

Sharing the CS 9300 with the Zimmer Institute’s students gives them an advantage as they enhance and refine their skills.

“I remain extremely impressed with the Zimmer Institute facility and training capabilities,” Dr. Maurice Salama, an industry-leading dental implantologist who serves as an instructor at the Zimmer Institute, said. “The utilization of both high-tech mannequin and cadaver labs, along with Carestream Dental’s CS 9300 CBCT imaging system and software, provides a very dynamic and robust educational opportunity for all attendees.”

For more information about the Zimmer Institute, call (800) 854-7019 or visit www.zimmerdental.com.

DENTAL IMAGING MADE EASIER

PreXion3D Eclipse includes the Prexion3D Viewer software

- Diagnose patients with more detail and clarity
- Present cases more confidently, increased acceptance
- Create the WOW factor with patients

Software Features

Multi-Data – PreXion Exclusive!

- Load multiple patient scans on a single screen
- Synchronize pre and post operative scans and detect differences, slice-by-slice

3D Video Clip Maker

- Quickly capture 3D animated video clips for patient education, case acceptance and lecture presentations
- Increase case acceptance through better patient understanding
Henry Schein Dental announces launch of Henry Schein Dental Surgical Solutions

Henry Schein Dental, the global dental business of Henry Schein, Inc. (NASDAQ: HSIC), the world’s largest provider of health-care products and services to office-based dental, animal health and medical practitioners, has announced the launch of Henry Schein Dental Surgical Solutions.

The group will specialize in providing a comprehensive package of specialty products and services, as well as innovative and personalized business solutions, to oral and maxillofacial surgeons and periodontists, according to the company.

Henry Schein Dental created a dedicated sales team to help oral and maxillofacial surgeons and periodontists bring their practices to higher levels of clinical and business success by serving as a full-service resource for all practice needs, enabling specialists to simplify their point of purchase.

“The Henry Schein Dental Surgical Solutions team understands the demands of a dental surgical practice and is trained to address surgical specialists’ unique needs,” said Maritza Alford, national director of sales, Henry Schein Dental Surgical Solutions. “We have a robust portfolio of products that an oral surgery or periodontal practice needs to maintain and grow its business, and our team is focused on supporting surgical specialists, such as oral surgeons and periodontists.”

Instead of buying pharmaceuticals from one company, implants from another and surgical equipment from a third, Henry Schein Dental Surgical Solutions will offer a complete suite of services, including: pharmaceuticals, equipment and technology, implants, bone-grafting materials, consulting services, financing options for practitioners and patients and many other products. Surgical specialists will be able to purchase all their products from field sales representatives, called Surgical Solutions Consultants (SSC). The Surgical Solutions Consultants are experienced in surgery and implant dentistry and have an in-depth understanding of surgical procedures and a referral-based practice.

In addition to supporting the full scope of a surgical practice, Henry Schein Dental Surgical Solutions empowers specialists with innovative and personalized business solutions that make a measurable difference for the specialist and their referrals, according to the company.

Henry Schein Dental Surgical Solutions is led by a team of executives with many years of experience in the implant and dental industry. The team includes:

- Dr. Neil Park, general manager, with more than 20 years of implant industry experience;
- Maritza Alford, national director of sales, who brings 19 years of dental experience in sales and leadership roles;
- Kerri Leslie, senior marketing manager, with nine years of experience from the medical field;
- Robert Riley, director of training and technical services and a certified dental technician (CDT), has extensive experience that includes key positions in the implant and orthodontic industries.

About Henry Schein Inc.

Henry Schein Inc. is the world’s largest provider of health-care products and services to office-based dental, animal health and medical practitioners. The company also serves dental laboratories, government and institutional health care clinics and other alternate care sites. A Fortune 500® Company and a member of the NASDAQ 100® Index, Henry Schein employs nearly 17,000 Team Schein Members and serves more than 800,000 customers.

transitional crown was placed, with placement of the final six months later. At the subsequent one-month, two-month, six-month, one-year and five-year appointments, no pain was reported, and complete bone fill in to the previous lesion area was stable.

IPL is a rare disorder, affecting approximately 0.26 percent of the population receiving implants. There are varying reasons for its cause, and it can sometimes be misdiagnosed or confused with retrograde peri-implantitis.

The combination of antibiotics and GBR principles has shown to be an effective way of treating IPL, keeping the implant intact and creating a complete bone fill at the lesion site. This case study appears to be the first of its kind, so further research will be needed to confirm findings.
